

# Interview

Mahsa Mohammadi

## About Me:

I'm Mahsa. Born in north of Iran in the middle of the spring, which is why I'm in love with nature.

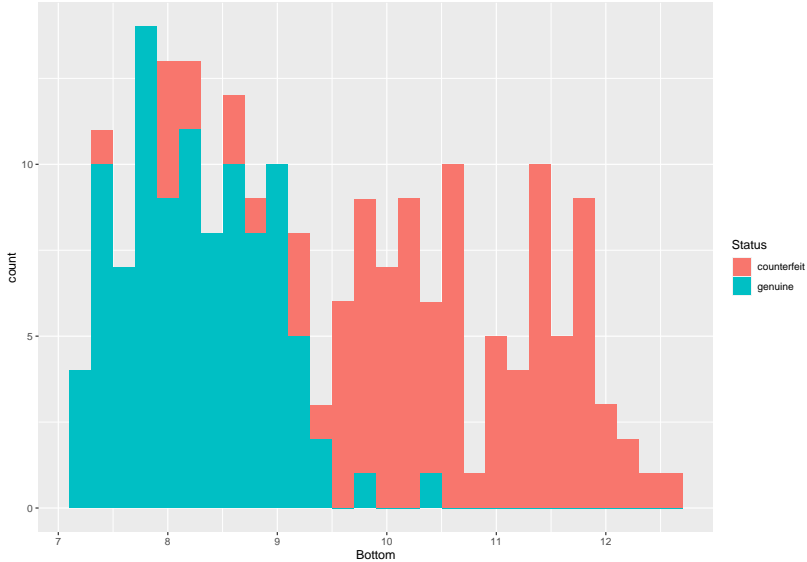

I'm a second year PhD student in Complex biosystems program. Since my advisor is part of Biological engineering department, I am part of BSE as well!

I'm working on developing new tools or theories to be able to model the microbiome. So after graduation I'll be computational biologist.
